PROFESSIONAL SUMMARY

Full-Stack Developer and the University of Toronto Alumnus with a Certificate in Full-stack Application Development, and BE in Mechanical Engineering boasting a remarkable graduation score of 96 (A). With a lifelong passion for programming and software development, I bring a blend of creativity, problem-solving skills, and a commitment to creating impactful solutions. Known for my organized, logical approach and hard-working ethos, I excel in both individual and team settings. My technical proficiency spans across a wide range of languages, frameworks, and database management systems, with a particular comfort in **MERN stack technologies and JavaScript development.**

TECHNICAL SKILLS

Languages: JavaScript, Node.js

Front-end Frameworks/Libraries: HTML5, CSS3, React.js, Redux, Vite, React Bootstrap, React Router, MUI, Chakra UI, Apollo Client, jQuery, Axios

Back-end Frameworks/Libraries: Express.js, MongoDB, Mongoose, Apollo Server, dotenv

Deploy: Render, Netlify, Heroku

Architecture: MVC, RESTful APIs, MERN Stack, PWA, SPA, OOP

Additional: Stripe, GraphQL, Git Version Control, Agile Software Development, JWT, DOM Manipulation, Jest

CORE PROJECTS

AdsTrees | github.com/EhsanAsh/AdsTrees | adstrees.com

- **Summary:** A groundbreaking web application merging advertising with environmental sustainability. AdsTrees offers a unique platform for viewers to watch ads and contribute to tree planting, aiding in carbon footprint offsetting.
- **Role:** Front-end, Back-end, DevOps
- **Tools:** A MERN stack and PWA application.

TravIS | github.com/EhsanAsh/TravIs | travis231017-9762a24c277b.herokuapp.com

- **Summary:** A web-based application designed for efficient travel itinerary management. It enables users to create and manage trip itineraries, track expenses, and engage with the travel community.
- **Role:** Back-end, DevOps
- **Tools:** HTML, CSS, JavaScript, jQuery, API, Node.js, MySQL, Sequelize, Chart.js, Express.js, Handlebars

Toronto Newcomers Guide | github.com/EhsanAsh/toronto-newcomers-guide | uoftgroup3.github.io/toronto-newcomers-guide

- **Summary:** An informative platform tailored for newcomers to the Greater Toronto Area, providing essential information to facilitate their transition into the new environment.
- **Role:** Front end, DevOps
- **Tools:** HTML, CSS, JavaScript, jQuery, API, Day.js, Materialize CSS
